

Getting started with Fusion Investments couldn't be easier, the following steps are all that is needed to start the automated system.

## Step 1: Signing up with Forex Broker

The first step is to sign up with one of our two forex broker partners:

- **ETX Capital (all world clients apart from the USA):**
- You must use the link provided in order to sign up. Alternatively please use the link on our website at: <http://www.fusionforex.co.uk/partners>
- **FXCM (USA clients only)**
- We will again give you a link to sign up with FXCM to get your account open.

When signing up you will be asked which platform you require, you will need to ask for the MT4 Trader Platform. Please ask us if you are unsure.

## Step 2: Deposit Starting Bankroll

After initial consultation with Fusion Investments you are free to deposit your starting bankroll, we highly recommend you start with £1,000/\$1,000 but can accept people with £500/\$500 starting bankrolls, this however will incur a monthly \$200 subscription until your bankroll reaches the £1,000/\$1,000 level (typically within the first months trading).

## Step 3: Sign Up with Trade Copier

Next you will need to sign up with our trade copier partner 4xSolutions, we will provide you with a sign up link in order to get up and running. Alternatively please use the link on our website at: <http://www.fusionforex.co.uk/partners>

Once signed up Fusion Investments will work with you to set the % risk you will take on your daily trades. This will in time change but typically we set a % percentage risk of 5% on every new account set up with us.

Our Trade Copier Partner 4xSolutions will require a small monthly subscription which will be billed to you directly, you must keep this subscription active in order for the automated trading process to continue operational.

To see the monthly subscription you will need to pay please click the 4xSolutions link found at: <http://www.fusionforex.co.uk/partners>

## Step 4: Monthly Updates and Commission Payments

Once all of the above has been completed you are ready to grow your bankroll by up to 100% every month! We will need to be notified of any planned withdrawals/deposits in order to plan your money management the right way, failure to do so could seriously effect your potential to profit.

Fusion Investments will require you to pay 20% commission on profits you make each month in order to keep trading, an invoice bill will be sent to you on the the 3rd of every new month in order to pay the previous months commission, we make it 3 days into the month so that you have time to withdraw the amount from your brokers bankroll.
